Unit 11 – DOM

Objectives:

- ✓ Able to interact with HTML document using DOM API

Project Structure

- A project called **JS-E.M.A1101** (this will be your root folder) is provided to you
- Put your work for each problem in corresponding folder inside root folder

Task 1:

Your task is to use DOM API to query the following DOM element

- div at line 13 (in HTML file) - save it to an variable called imageContainer
- Back button at line 18 (in HTML file) – save it to an variable called backBtn
- Next button at line 19 (in HTML file) – save it to an variable called nextBtn

Task 2:

Create a function called renderImage() that set the innerHTML of imageContainer to an HTML img with src is the variable images at index

Task 3:

In body of function callback of backBtn you have to do the following:

- Decrease value of variable **index** by 1
- Check if that variable is less then 0 then set it to 0
- Call the function renderImage() from Task 2

In body of function callback of nextBtn you have to do the following:

- Increase value of variable **index** by 1
- Check if that variable is greater or equal the length of array **images** then set index to the length of images - 1
- Call the function renderImage() from Task 2

Expected output:

Image Slideshow
