Unit 7 – HTML Form
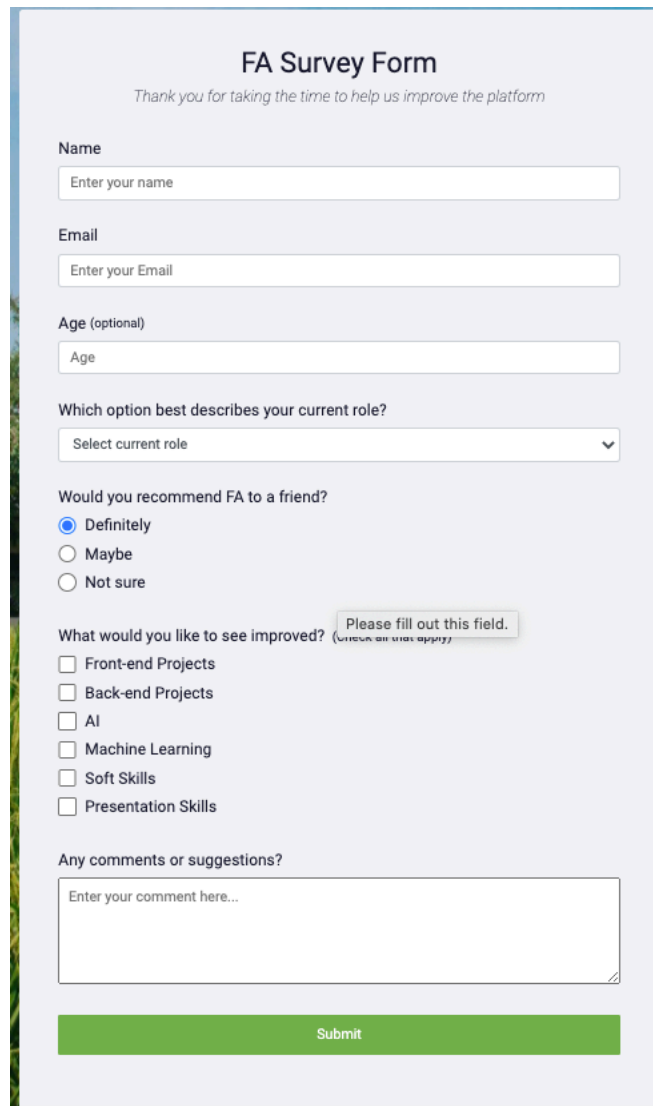

Objectives:

- ✓ Understand the syntax of HTML Form: <form>, <label>, <input>

Project Structure

- You are given a zip file **HTML-E.M.A701.zip**
- Extract the zip file, there is folder called **HTML-E.M.A701** (this will be your top folder)
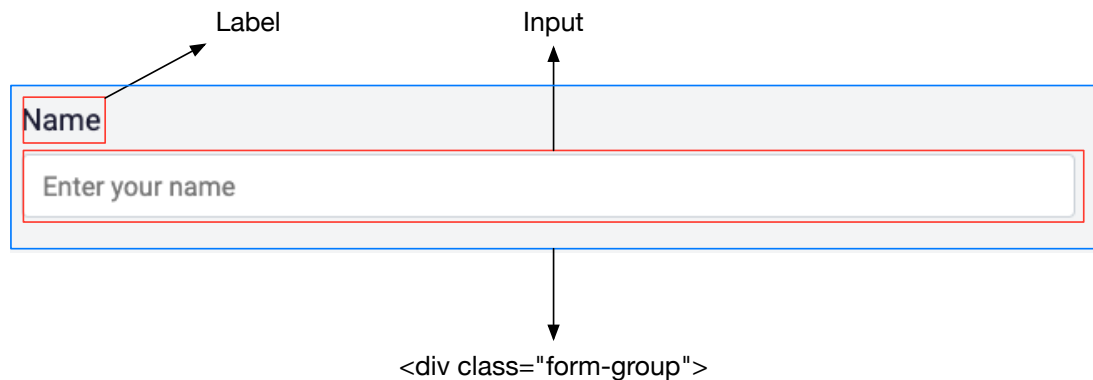

Problem:

You are working on a Survey Form, the finished output should look like figure below:

Hints and tips

- Each control must follow the structure like figure below: there is always a label associated with a input

```
1.          <div class="form-group">
2.            <label for="name">Name</label>
3.            <input
4.              type="text"
5.              name="name"
6.              id="name"
7.              class="form-control"
8.              placeholder="Enter your name"
9.              required
10.           />
11.         </div>
```

- For <input> text, and <select> tags, you have to use **form-control** class

- For <input> radio, you have to use **input-radio** class

- For <input> checkbox, you have to use **input-checkbox** class

- For <textarean>, you must use **input-textarea** class

- For the submit button, you have to use **submit-button** class
